

**I HAVE SEEN MANY E.SYBOX IN BANGKOK**

**WHERE:**

Bangkok is nowadays a capital of the world. Thanks to a continuous economic growth and new buildings raising every year, Bangkok is an example of modernity and progress, thoroughfare for trade and cultures between Western countries and South-East Asia. With excellent services and big innovations, Bangkok is still maintaining its history and culture, with unaltered traditions that can be easily detected on local people behavior. That's why Bangkok is the favorite destination both for tourists both for businessmen, invading every road and every corner of the city.

**WHEN:** January 2018

**CONTRACTOR:** Pneumax / Active Ceramic

**CUSTOMER:** Navatane Project

## THE REQUEST:

Navatane neighborhood is located in the north-east area of Bangkok, 20 km from the city center. Its position is appreciated by those people who loves to breath the fresh air of nature and green landscapes. Navatane lets you luxuriate in a magnitude of serenity, and circulate around recreational activities whilst embracing the whispering orchestra of crickets day and night. A golf course center is available in the big park surrounded by hills and lakes, and the prime-level residential area is expanding: it will accommodate 16 new houses with an average width of 60 meters.

The responsible of the “Navatane residential project” met DAB Pumps during an exhibition in Bangkok. He was surprised by the revolutionary concept of the booster set: easy to use and easy to install, no need of control box to operate the function of the two pumps, beautiful design perfectly matching the style of the high-end furniture and equipment of the houses.

The customer tried one unit at first, and after the success and the positive feedback, he extended the E.sytwin to 5 further villas. The rest of the houses might be changed later, switching from a traditional system to a modern E.sytwin. This will also permit a major comfort to users and energy saving, thanks to constant pressure and VFD control.

- 12 x E.SYBOX

- 6 x E.SYTWIN
